

PENCIL ENGRAVING GUIDE

STEP 1 - DESIGN YOUR PENCIL

All Sprout pencils are laser engraved with many options and few limitations:

- Use any typography, logo or logotype
- Write the plant name in any typography

...but the Sprout logo will **always** have to be engraved and placed as shown to the right.

STEP 2 - DO THE ARTWORK

Please use our engraving template and follow the guidelines:

- Max. height of logo and/or typography is 5 mm
- Max. length of logo and/or typography is 10 cm
- Keep all elements on the same baseline for best result
- Simplify or leave out very detailed logo elements or icons
- Avoid very small typography in your design for best result. Laser engraving is very precise, but it's still carving in wood.

STEP 3 - SEND TO US

Before you send the final artwork to us, please make sure that:

- Logo is outlined and converted into vector format
- Text is outlined and converted into vector format
- Print file is in full black and contain no colors
- Print file format is **pdf, ai or eps**
